VARI-CAP

SO SIMPLE
SO REVOLUTIONARY

The UTA Vari-Cap Instrument Cable is the culmination of years of listening, experimenting, and ultimately designing a revolutionary approach to the common instrument cable. Finally, a player is able to conveniently vary the amount of capacitance imparted by the instrument cable itself.

The patented high resolution 16 position control gives you access to a whole new palette of sounds you've never heard from your amps and instruments before. You simply have to hear it to believe the difference it can make.
